Seeking a challenging front end developer position in a dynamic and innovative organization where I can leverage my technical, soft and creative skills to develop and maintain responsive, user-friendly, and visually appealing websites and I can also aim to learn new competencies, and contribute significantly to the success and growth of the institution.

Work Experience

Goods In Motion (GIM) - Associate Software Engineer (Front-end)

Jun 2023 - current

Dhaka, Bangladesh

- Developed and integrated new features to enhance user experience in both Angular and React.js applications. Ensured the software remained bug-free by systematically identifying and resolving existing issues through comprehensive testing and debugging in both frameworks.
- Successfully integrated newer APIs with Angular and React.js projects, enabling seamless data exchange and enhanced functionality, which significantly improved overall user interaction and satisfaction.
- Transformed Figma designs into responsive and visually appealing web pages using Bootstrap, HTML, and CSS, maintaining design integrity and usability across various devices and browsers, while leveraging jQuery for dynamic elements.
- Improved the performance and loading times of various landing pages by 20–30% through optimizing code for both Angular and React.js projects, leading to a faster and more efficient user experience.
- Contributed to and improved in-house libraries for both Angular and React.js projects, ensuring code reusability and consistency across projects, which streamlined development processes and maintained high code quality standards.

Goods In Motion (GIM) - Intern

Feb 2023 - May 2023

Dhaka, Bangladesh

- Gained hands-on experience with version control systems, particularly Git, mastering essential commands and workflows to collaborate effectively on codebases.
- Developed a solid understanding of front-end frameworks by working extensively with React.js and Angular, enabling the creation of dynamic and responsive web applications.
- Enhanced problem-solving skills and the ability to debug and optimize code within these frameworks, contributing to more efficient and maintainable projects.

Education

Independent University, Bangladesh - Bachelor of Science, Computer Science & Engineering

2018 - 2023

Dhaka, Bangladesh

Skills

- Angular, Git, TypeScript, JavaScript (ES6, React, Redux, Node.js, jQuery), Bootstrap 5, HTML, CSS, Vue.js, C++, Python, Java

Projects

StayBnb (repo: github.com/ghoshprottoy98/StayBnb-303-project)

- Built a dynamic and responsive front-end interface using HTML and CSS, ensuring optimal user experience across various devices and screen sizes.
- Designed and integrated intuitive front-end filters to facilitate ease of search, allowing users to quickly find properties that match their criteria.
- Collaborated on the development of a new feature that enables users to negotiate rent with property owners after submitting a rent request, enhancing user engagement and flexibility.
- Improved the web application's loading time through code optimization and efficient resource management, resulting in a faster and more seamless user experience.
